

Ondatherm® 1001

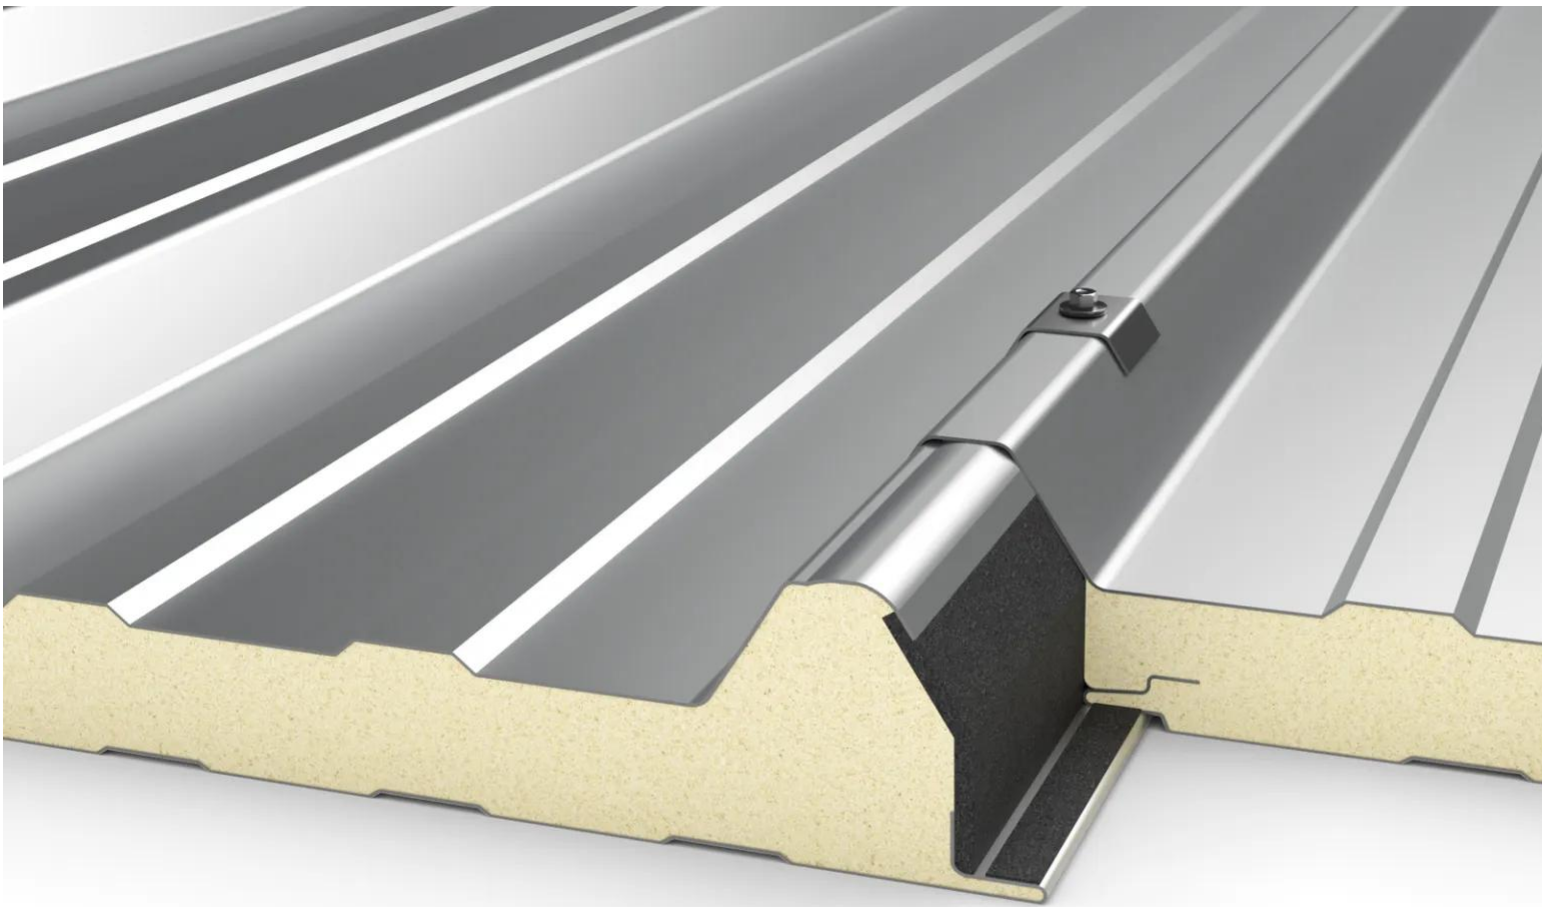

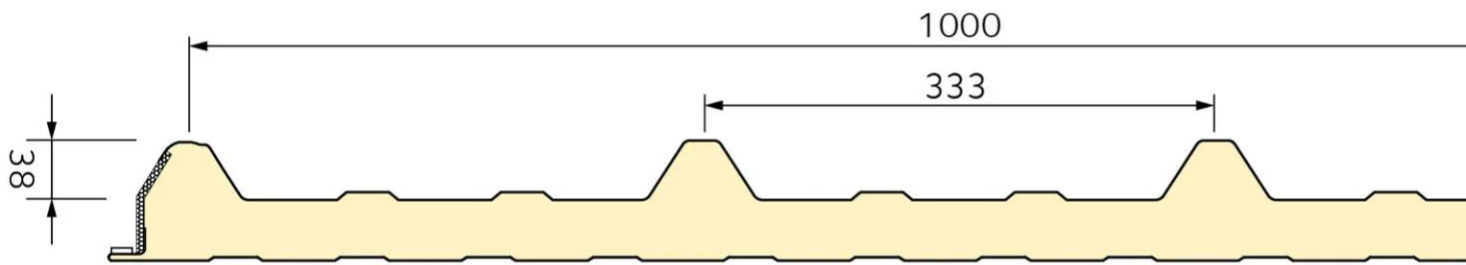

Ondatherm® 1001 panels are the first choice for the most economical roofing solutions due to their outstanding load-bearing capacity, air and watertightness and at the same time high thermal insulation. Spans of up to 6m can be bridged in a self-supporting manner. The geometric shape and joint design is optimised for the best possible water drainage.

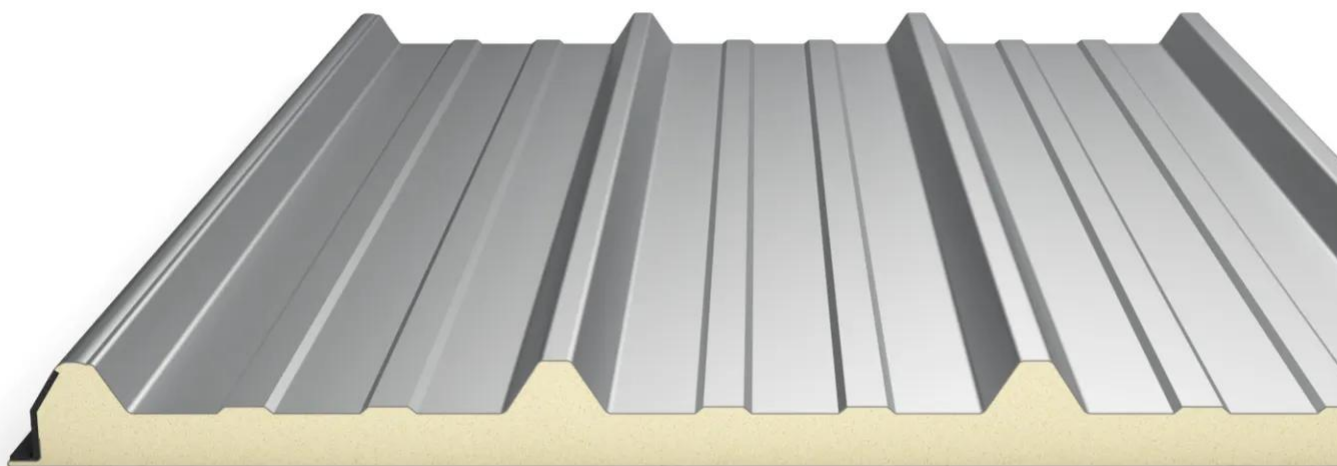

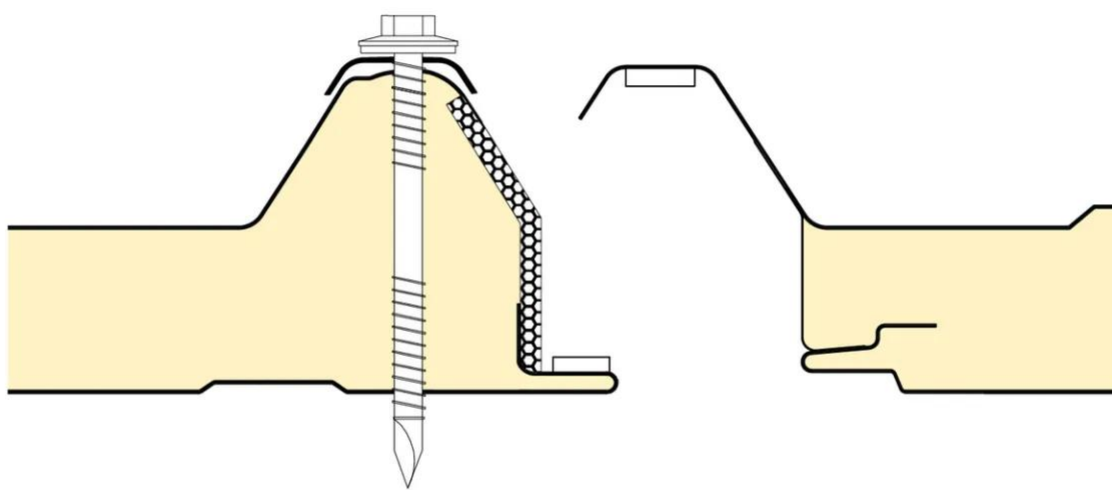

- Fire resistance REI 30
- U-value approval Z-23.11-1911
- Combinable with mineral wool panels
