

TP20 LS

TP 20 LS is our best-selling sheet profile—and for good reason. This classic profile is equally suited for residential homes, commercial buildings, industrial structures, and agricultural buildings. The sheet has a symmetrical top and bottom profile and features a water lock, providing extra protection against water infiltration at the side overlap.

Suitable for most roofs with a slope of at least 14 degrees.

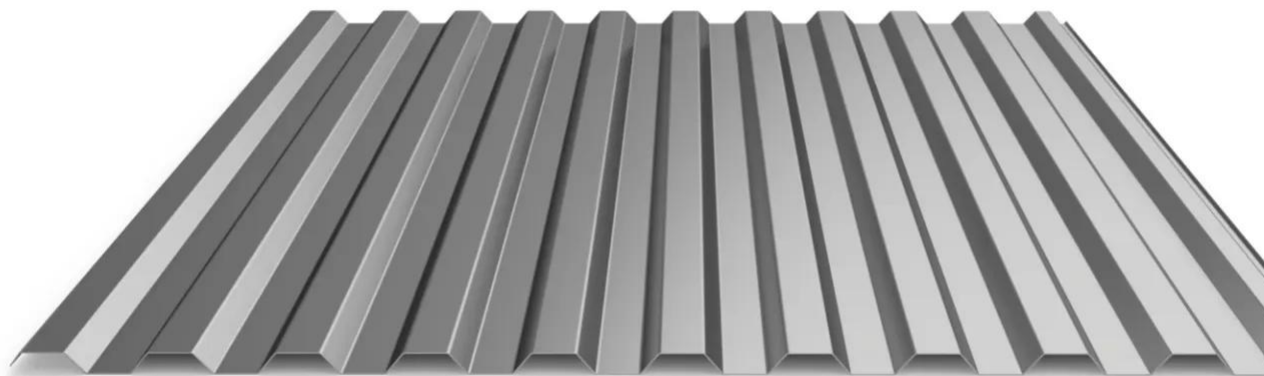

- Available in full lengths up to 8 meters, reducing the number of joints.
- A cost-effective option, making it a great choice for any project.
- Quick and easy installation, allowing you to complete the job faster.
