

Sinus 27T

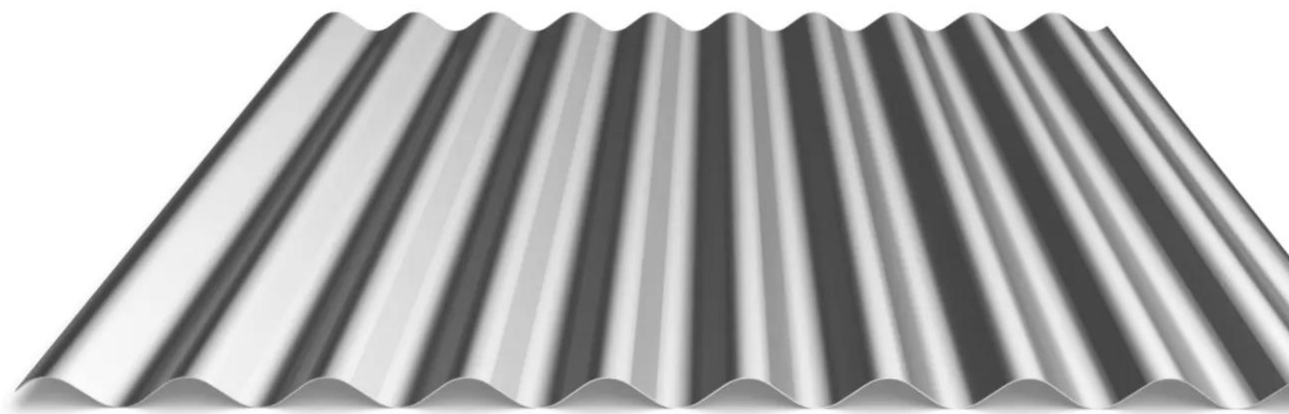

Sinus 27 is a unique profile that gives your roof or wall a traditional look. The soft profile is suitable for both modern and older houses. For roofs, slopes down to at least 14 degrees are recommended.

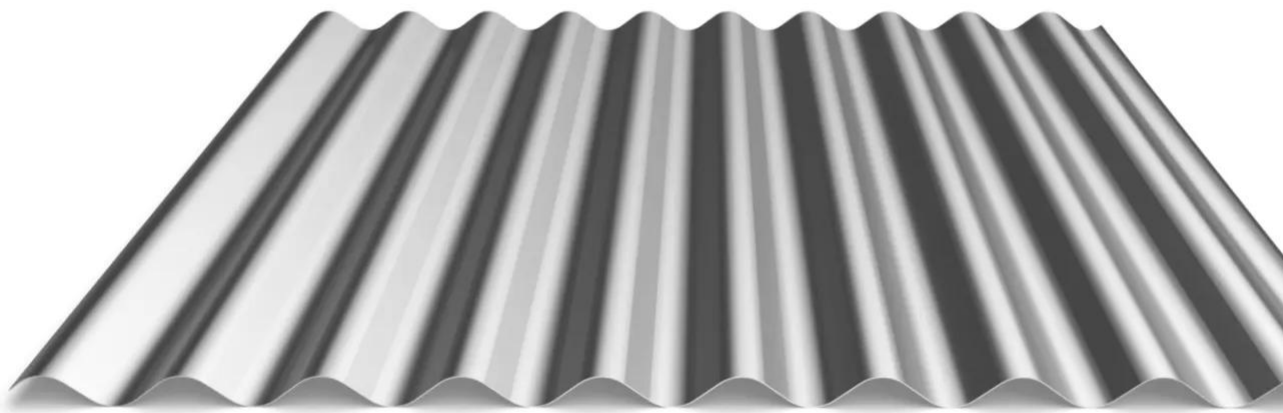

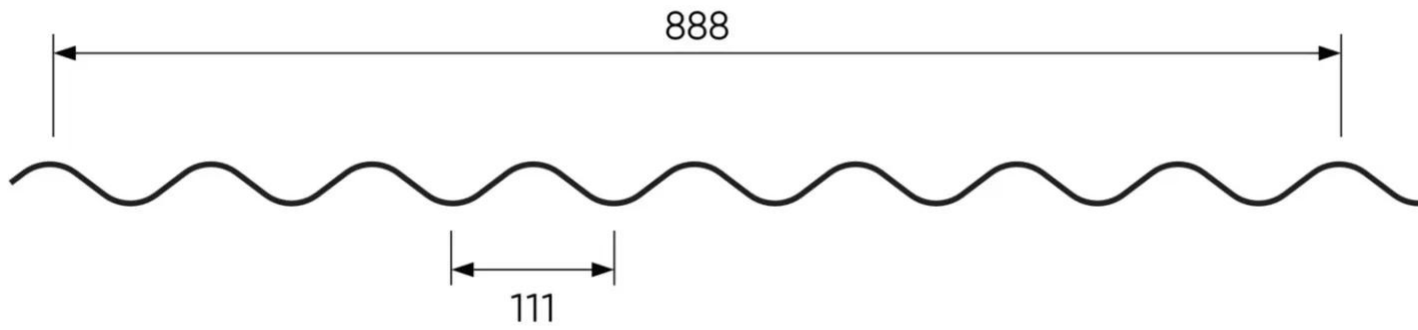

The profile has no water trap and is therefore installed with an extra overlap on the roof for good sealing in the side overlap. Cut over two profile tops with a cover width of 889 mm.

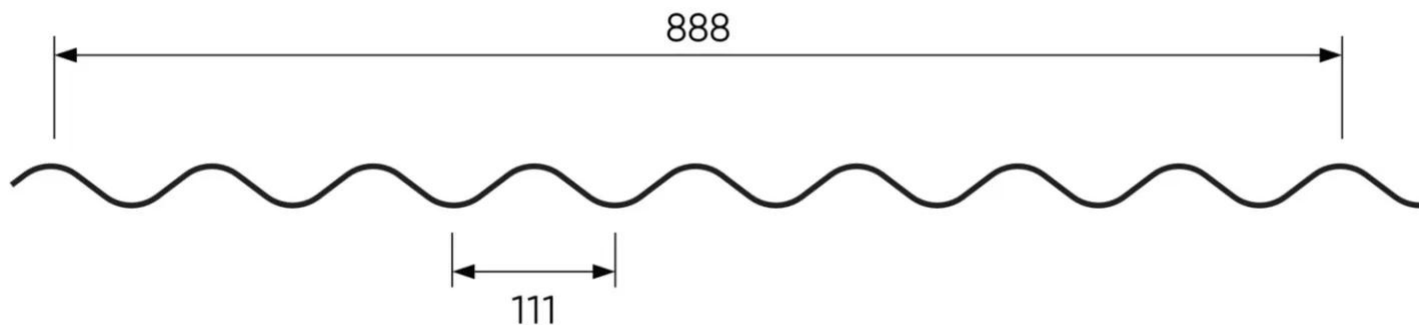

Sinus 27 is manufactured both in Sweden and in Europe.

- Thickness 0,60 mm
- Width: 899mm for roof application, also available in 1000mm for wall
- Length: 500-8000mm
