

Hacierco TP 206.1/375

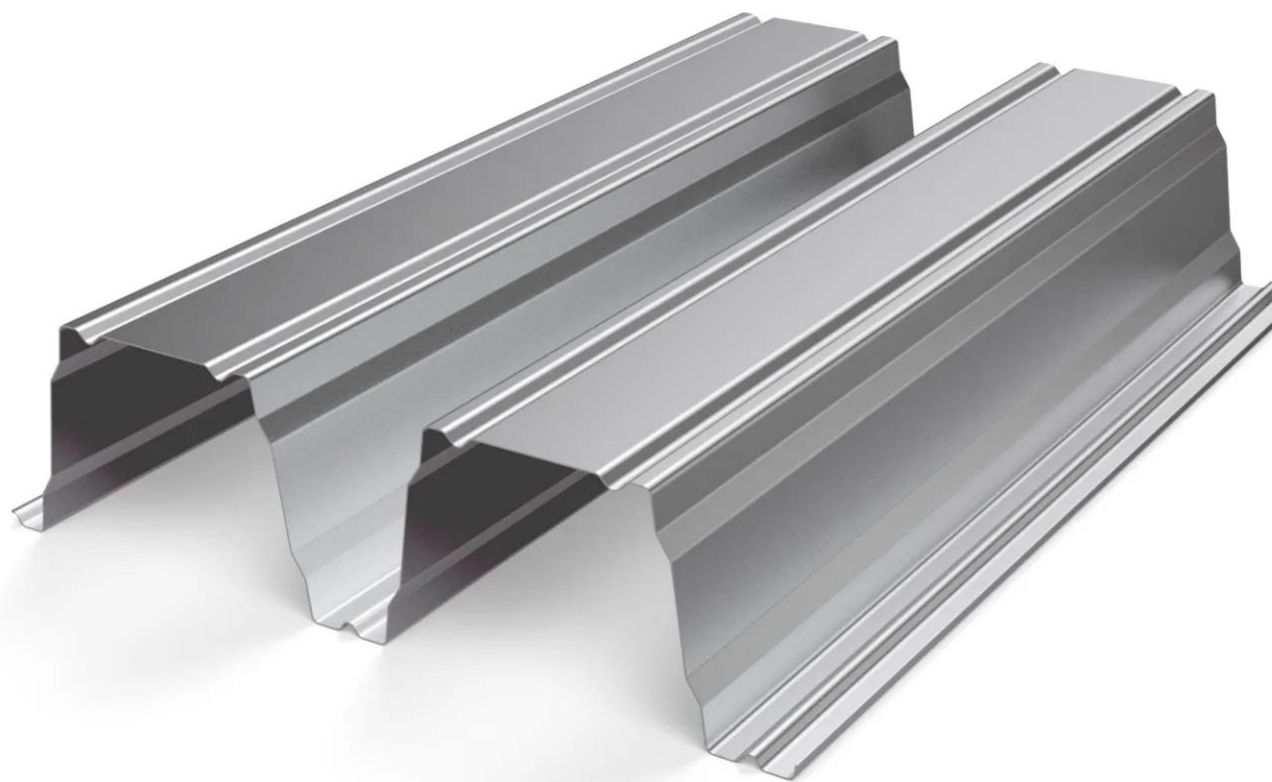

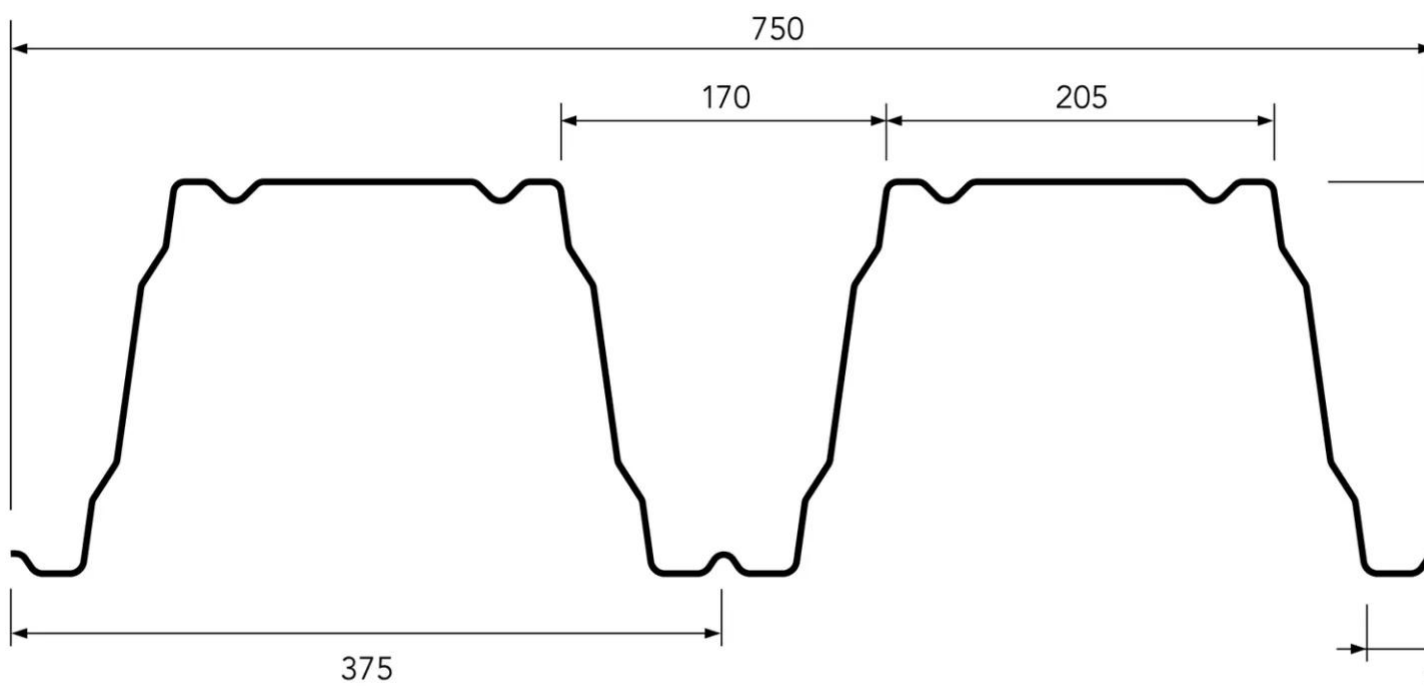

The trapezoidal profile Hacierco TP 206.1/375 is a long span decking for thermally insulated roof structures. It forms the upper space closure and can be produced in many colours for architecturally demanding solutions. As a particularly high profile, it is also used as a cold roof.

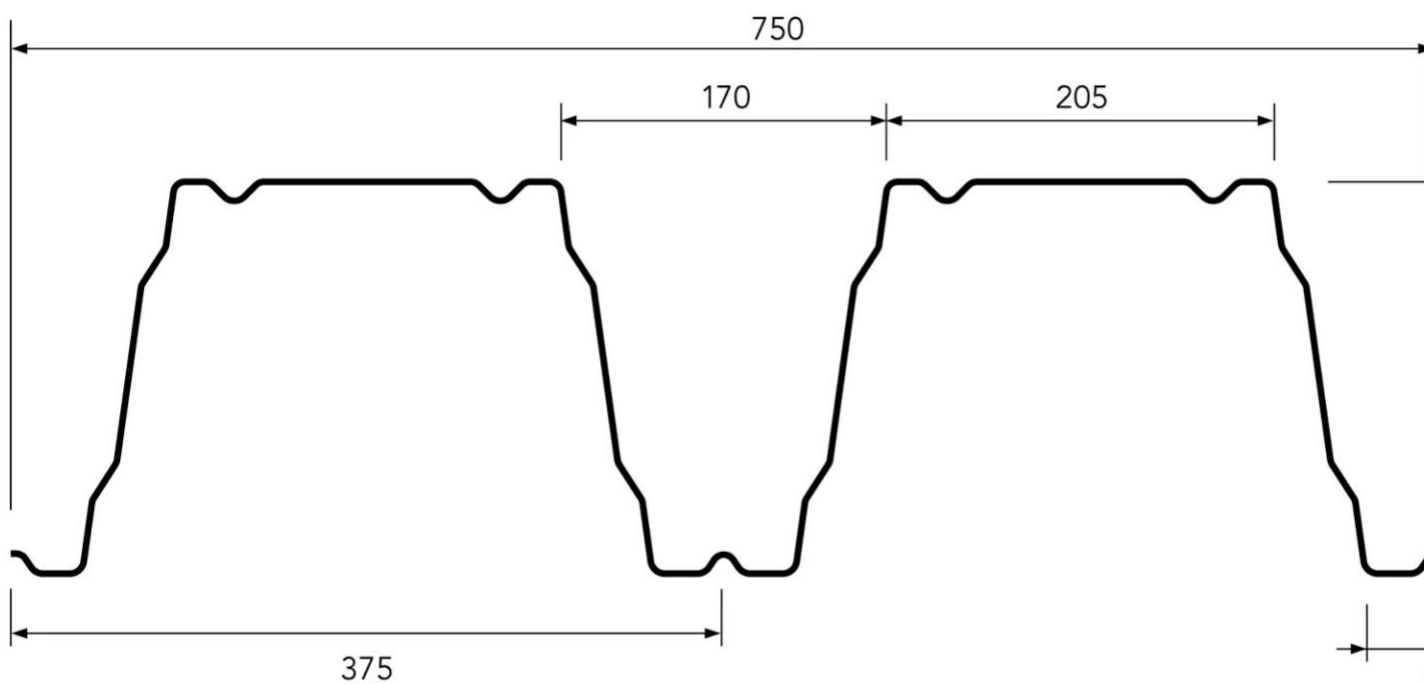

- Available as acoustic profile in perforated design
- Available with anticondensate coating
- Allows sound insulation values up to 50 dB
- Production lengths 2.000 mm 28.000 mm
- Other lengths on request
