

## Hacierco TP 160/250

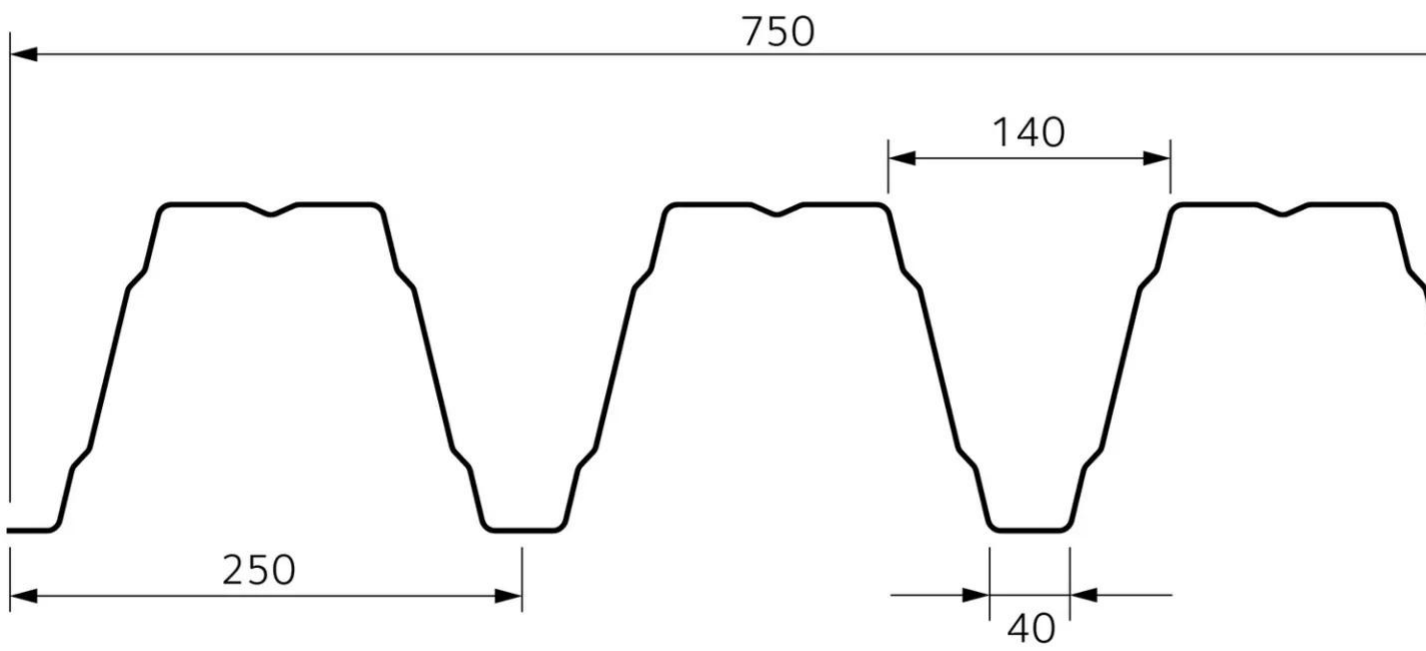

The trapezoidal profile Hacierco TP 160/250 is usually used as a supporting profile (tray) in the so-called positive situation for thermally insulatedRoof structures used. It forms the upper space and can be produced for architecturally demanding solutions in very many colors.

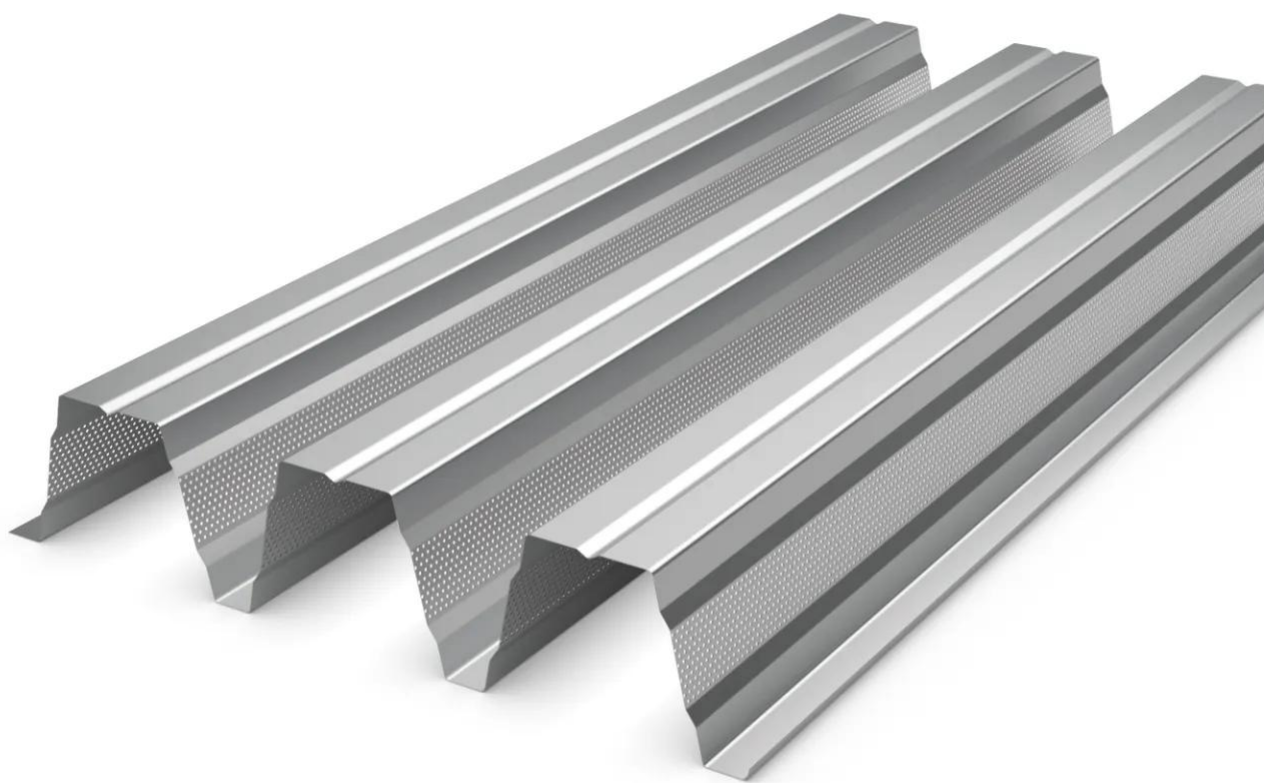

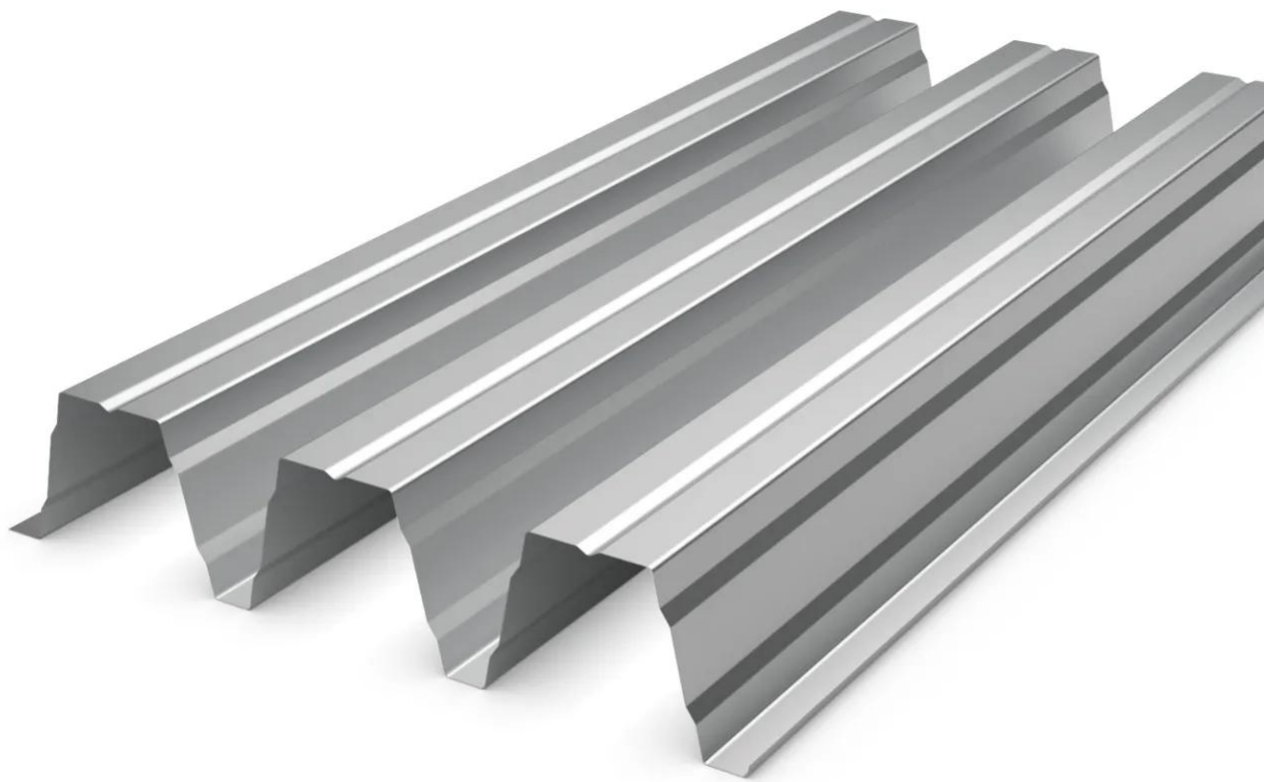

- Steel trapezoidal profile according to EN 1993-1-3
- Min/max manufacturing length: 2 m / 25 m
- Corrosion protection according to DIN 55634/ DIN EN 10346
- Available in steel thicknesses of 0.75/0.88/1.00/1.13/1.25/1.50 mm
- Available as acoustic profile in perforated design
- Available with anti-condensation coating
- Allows sound insulation values of up to 50dB
