

Ondatherm 1001

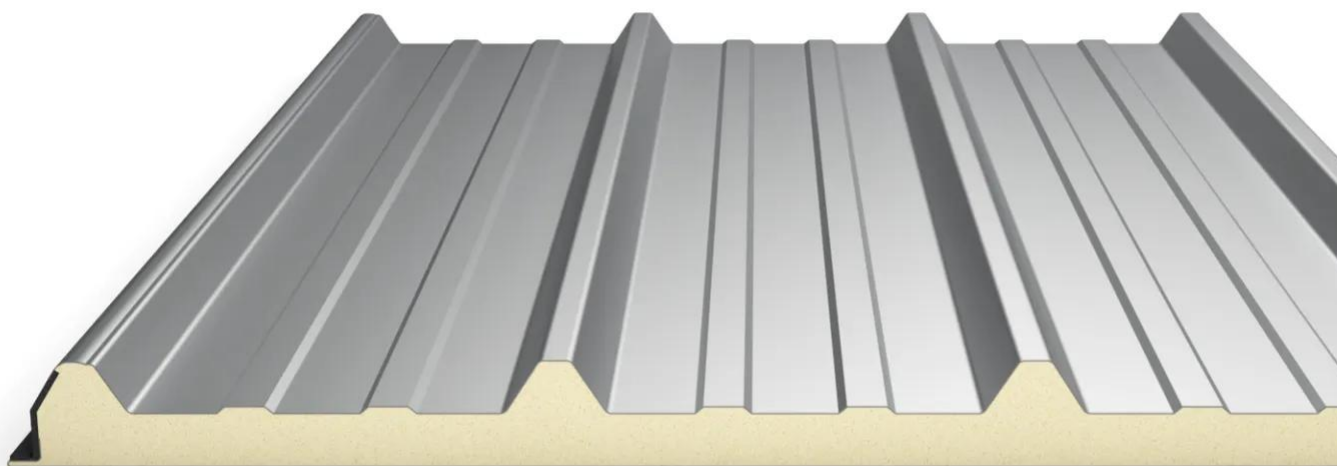

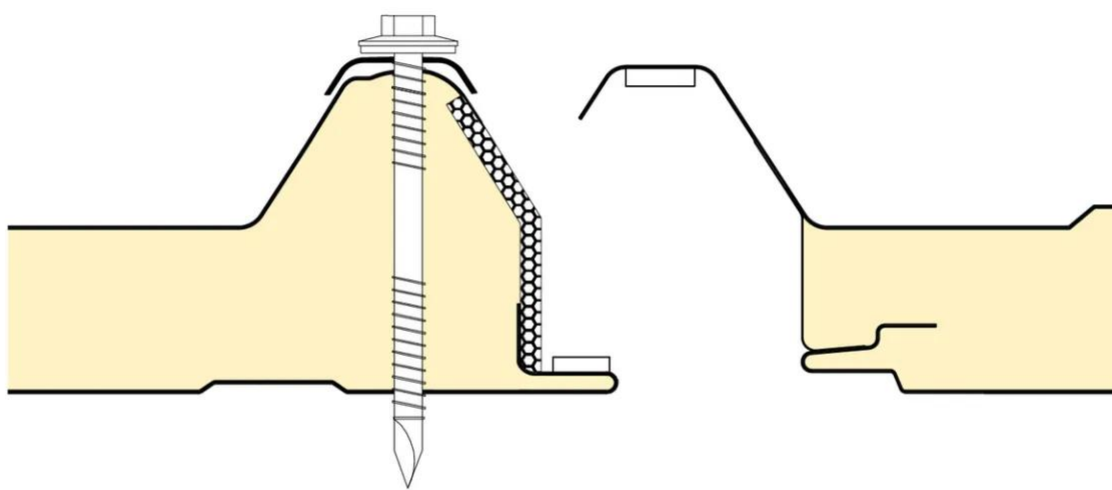

Ondatherm® 1001-paneler er førstevalget for de mest økonomiske takløsningene på grunn av deres enestående bæreevne, luft- og vanntetthet, og samtidig høy termisk isolasjon. Spennvidder på opptil 6 meter kan brospennes selv bærende. Den geometriske formen og skjøtedesignet er optimalisert for best mulig vannavrenning.

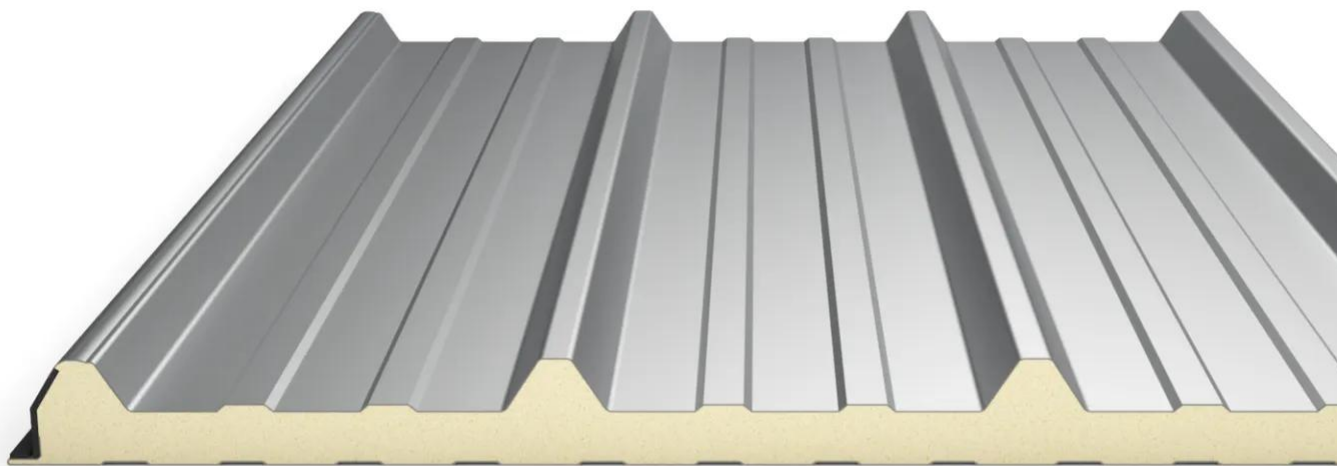

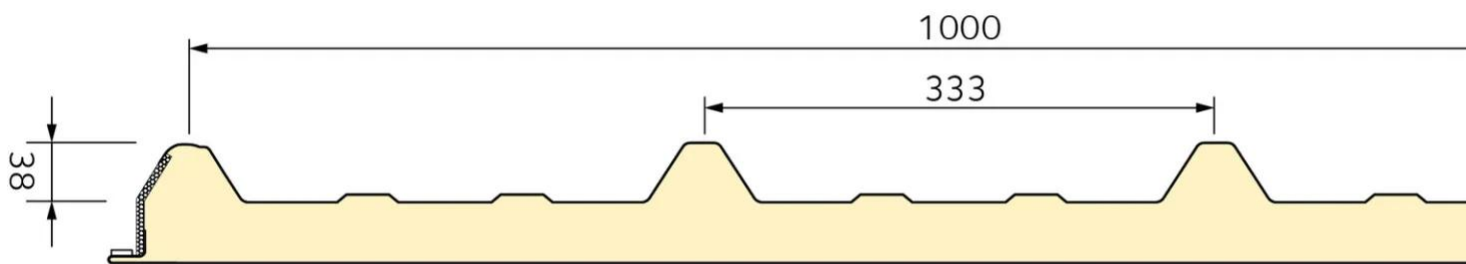

- Brannmotstand: REI 30
- U-verdi-godkjenning: Z-23.11-1911
- Kan kombineres med mineralullpaneler
